Instructions

Step 1 - Safety

- Unload the weapon
- Physically and visually inspect the cylinder well to ensure that all ammunition has been removed.
- Store ammunition in an area that is separate from your training area.

⚠ Always personally verify that all ammunition has been removed before training.

Converting your 9mm SureStrike™ to a 44Mag or 45LC revolver use the appropriate sleeve adapter.

Converting the 9mm SureStrike™ to a 38SPC / 357 caliber, change your 9mm action cap to a 38SPC action cap.

Tip: Safety pipe and nut are not used with any type of revolver.

Step 2 - Installation 44MAG /45LC - Sleeve type

Unscrew the 9mm cap from the SureStrike™, and insert the battery with the plus side up.

Tip: Push on the black primer in the back of the action cap, to confirm the laser works properly.

Insert the SureStrike™ Laser Cartridge all the way into the adapter sleeve from the rimed side of the adapter.
Insert the cartridge with the sleeve to the revolver cylinder.

Step 3 - Installation of 38SPC / 357 - Cap Type

Unscrew the 9mm / 38SPC action cap from the SureStrike™, and insert the battery with the plus side up.
Screw back the 38SPC back cap to the laser.

Tip: Push on the black primer in the back of the action cap, to confirm the laser works properly.

Insert the cartridge into the 38SPC revolver cylinder.

Using the SureStrike™ Laser Cartridge not according to the user guide will void the warranty.

No liability is expressed or implied for damage or injury as a result of installation or use of this product.

Warranty is limited to the replacement or repair of the original product only.
